MAIN STREET

On Monday, July 11th, in preparation for repaving the south end of South Main Street, a crew will grind up the top layer of pavement on Pleasant Street Extension and both sides of South Main Street, from the south end of the current work zone south to Storrs Street. This will be minimally disruptive to motorists. Lane shifts will be in effect. There will be no on-street parking allowed in this area from Sunday evening through Tuesday evening. On Tuesday, a paving crew will put a finish coat of asphalt on the sections noted above. The paving will take place from 7:00 AM to 7:00 PM. Until the fresh pavement cools, motorists and delivery trucks will not be allowed to drive on it, and access to driveways and parking lots will be affected. Tuesday will be a particularly disruptive day for motorists on South Main Street and they are encouraged to seek alternative routes. The freshly paved areas will be striped on Friday, July 15th.

BOAT RAMP DREDGING

Dredging of the boat ramp at Kiwanis Riverfront Park was completed this week. The ramp will be re-opened by this afternoon. The photos below show what an improvement this project made to the boat ramp.

MAPLE GROVE CEMETERY REPAIRS

Repairs to the roadways in Maple Grove Cemetery have begun. The contractor has removed all of the old asphalt; graded and compacted the underlying surface; and begun to place the base coat of asphalt. The \$65,000 CIP project will improve and upgrade the condition of all the roadways in the cemetery.

NEW HYDRO-SEEDER

The City recently purchased a new 500 gallon Finn Hydro-Seeder. The impetus for the purchase was the continued challenge of starting new grass on winter graves and other problematic graves in the cemeteries. The unit will not be used exclusively in the cemeteries. It will also be used for athletic fields, the golf course, plow damaged areas, and other areas where quick development of turf is required.
